Electrical Installation Condition Report

Requirements for Electrical Installations - BS 7671:2018+A2:2022 (IET Wiring Regulations 18th Edition)

Guidance for recipients:

This report is an important and valuable document which should be retained for future reference.

1. The purpose of this Report is to confirm, so far as reasonably practicable, whether or not the electrical installation is in a satisfactory condition for continued service (see Section E). The Report should identify any damage, deterioration, defects and/or conditions which may limitations of this inspection, be fully identified. Such give rise to danger (see Section K).

2. This Report is only valid if accompanied by the Inspection Schedule(s) and the Schedule(s) of Circuit Details and Test Results.

3. The person ordering the Report should have received the original Report and the inspector should have retained a duplicate.

4. The original Report should be retained in a safe place and be made available to any person inspecting or undertaking work on the electrical installation in the future. If the property is vacated, this Report will provide the new owner / occupier with details of the condition of the electrical installation at the time the Report was issued.

5. Section D (Extent and Limitations) should identify fully the extent of the installation covered by this Report and any limitations on the inspection and testing. The inspector should have agreed these aspects with the person ordering the Report and with other interested parties (licensing authority, insurance company, mortgage provider and the like) before the inspection was carried out.

6. Some operational limitations such as inability to gain access to parts of the installation or an item of equipment may have been encountered during the inspection. The inspector should have noted these in Section D.

7. For items classified in Section K as C1 ("Danger Present"), the safety of those using the installation is at confirm it is in operational condition in accordance with risk, and it is recommended that a skilled person or persons competent in electrical installation work undertakes the necessary remedial work immediately.

8. For items classified in Section K as C2 ("Potentially Dangerous"), the safety of those using the installation may be at risk and it is recommended that a skilled person or persons competent in electrical installation work undertakes the necessary remedial work as a matter of urgency.

9. Where it has been stated in Section K that an observation requires further investigation code FI the inspection has revealed an apparent deficiency which may result in a code C1 or C2 could not, due to the extent or observations should be investigated as soon as possible. A further examination of the installation will be necessary, to determine the nature and extent of the apparent deficiency (see Section F).

10. For safety reasons, the electrical installation should be re-inspected at appropriate intervals by a skilled person or persons competent in such work. The recommended date by which the next inspection is due is stated in Section F of the Report under 'Recommendations' and on a label at or near to the consumer unit /distribution board (where required).

11. Where the installation includes a residual current device (RCD) it should be tested six-monthly by pressing the button marked 'T' or 'Test'. The device should switch off the supply and should then be switched on to restore the supply. If the device does not switch off the supply when the button is pressed, seek expert advice. For safety reasons it is important that this instruction is followed.

12. Where the installation includes an arc fault detection device (AFDD) having a manual test facility it should be tested six-monthly by pressing the test button. Where an AFDD has both a test button and automatic test function, manufacturer's instructions shall be followed with respect to test button operation.

13. Where the installation includes a surge protective device (SPD) the status indicator should be checked to manufacturer's information. If the indication shows that the device is not operational, seek expert advice. For safety reasons it is important that this instruction is followed.

14. Where the installation includes alternative or additional sources of supply, warning notices should be found at the origin or meter position or, if remote from the origin, at the consumer unit or distribution board and at all points of isolation of all sources of supply.

ELECTRICAL INSTALLATION CONDITION REPORT - Schedule of Inspections

for Domestic and Similar Premises up to 100 A

Requirements for Electrical Installations BS7671:2018+A2:2022 (IET Wiring Regulations 18th Edition)

Outcomes Acceptable Unacceptable Improvement Further Inadequacies: (Items 1.1 - 1.1.5 Only) Not Verified: Limitation: Not Applicable: condition: condition: State recommended: Investigation: Inaded Pass C1 or C2 C3 NV I im N/A FI uite In the outcome column use the codes above. Provide additional comment where appropriate. C1/C2/C3 and FI coded items to be recorded in section K of the condition report. Item No. Description Outcome 1.0 INTAKE EQUIPMENT (VISUAL INSPECTION ONLY); 1.1 Service cable Pass 1.1.1 Service head Pass 1.1.2 Earthing arrangement Pass 1.1.3 Meter tails Pass 114 Pass Metering equipment 1.1.5 Pass Isolator (where present) Person ordering work/dutyholder notified NOTE 1 Where inadequacies in the intake equipment are encountered, which may Pass result in a dangerous or potentially dangerous situation, the person ordering the work and/or dutyholder must be informed. It 1.1.6 is strongly recommended that the person ordering the work informs the appropriate authority. NOTE 2 For this section only, where inadequacies are found, an X should be put against the appropriate item and a comment made in Section K 1.2 Pass Consumer's Isolator (where present) 1.3 Pass Consumer's meter tails 2.0 Presence of adequate arrangements for other sources such as microgenerators (551.6; 551.7) 2.1 Presence of adequate arrangements where generator to operate as a switched alternative (551.6) N/A 2.2 Adequate arrangements where a generating set operates in parallel with the public supply (551.7) N/A 3.0 EARTHING / BONDING ARRANGEMENTS (411.3; Chap 54) Presence and condition of distributor's earthing arrangements (542.1.2.1: 542.1.2.2) Pass 3 1 32 N/A Presence and condition of earth electrode connection where applicable (542.1.2.3) 3.3 Provision of earthing/bonding labels at all appropriate locations (514.13.1) Pass 3.4 Confirmation of earthing conductor size (542.3; 543.1.1) Pass 3.5 Accessibility and condition of earthing conductor at MET arrangement (543.3.2) Pass Pass 3.6 Confirmation of main protective bonding conductor sizes (544.1) 3.7 Condition and accessibility of main protective bonding conductor connections (543.3.2; 544.1.2) Pass 3.8 Pass Accessibility and condition of other protective bonding connections (543.3.1: 543.3.2) 4.0 CONSUMER UNIT(S) / DISTRIBUTION BOARD(S) 4.1 Adequacy of working space/accessibility to consumer unit/distribution board (132.12; 513.1) Pass 4.2 Security of fixing (134.1.1) Pass 4.3 Condition of enclosure(s) in terms of IP rating etc (416.2) Pass 44 Pass Condition of enclosure(s) in terms of fire rating etc (421.1.201; 526.5) 45 Enclosure not damaged/deteriorated so as to impair safety (651.2) Pass 4.6 Presence of main linked switch (as required by 462.1.201) Pass 4.7 Operation of main switch(es) (functional check) (643.10) Pass 48 Manual operation of circuit-breakers and RCDs and AFDDs to prove functionality (643.10) Pass Pass 49 Correct identification of circuit details and protective devices (514.8.1; 514.9.1) 4.10 Presence of RCD six-monthly test notice at or near consumer unit/distribution board, where required (514.12.2) Pass 4.11 Presence of alternative supply warning notice at or near consumer unit/distribution board (514.15) Pass 4.12 Presence of other required labelling (please specify) (Section 514) Pass Compatibility of protective devices, bases and other components; correct type and rating, (No signs of unacceptable thermal Pass 4.13 damage, arcing or overheating) (411.4; 411.5; 411.6; Sections 432,433) 4 14 Pass Single-pole switching or protective devices in line conductor only (132.14.1; 530.3.3) 4.15 Protection against mechanical damage where cables enter consumer unit/distribution board (522.8.1; 522.8.5; 522.8.11) Pass 4.16 Protection against electromagnetic effects where cables enter consumer unit/distribution board/enclosures (521.5.1) Pass 4.17 RCD(s) provided for fault protection -includes RCBO(s) (411.4.204; 411.5.2; 531.2) Pass 4.18 RCD(s) provided for additional protection/requirements - includes RCBO(s) (411.3.3; 415.1) C3 4.19 Confirmation of indication that SPD is functional (651.4) C3 Confirmation that ALL conductor connections, including connections to busbars, are correctly located in terminals and are Pass 4.20 tight and secure (526.1) 4.21 Adequate arrangements where a generating set operates as a switched alternative to the public supply (551.6) N/A 4.22 Adequate arrangements where a generating set operates in parallel with the public supply (551.7) N/A 5.0 FINAL CIRCUITS Identification of conductors (514.3.1) Pass 51 Cables correctly supported throughout their run (521.10.202; 522.8.5) Pass 5.2 5.3 Condition of insulation of live parts (416.1) Pass

ELECTRICAL INSTALLATION CONDITION REPORT - Schedule of Inspections

for Domestic and Similar Premises up to 100 A

Requirements for Electrical Installations

BS7671:2018+A2:2022 (IET Wiring Regulations 18th Edition)

5.4		eathed cables protected by enclosure in conduit, ducting or trunking (521.10.1). To inc king systems (metallic and plastic)	clude in the integrity of conduit	Pass						
5.5		y of cables for current-carrying capacity with regard for the type and nature of installa	ation (Section 523)	Pass						
	L CIRCUITS									
5.6	1	tion between conductors and overload protective devices (433.1; 533.2.1)	F	Pass						
5.7	Adequacy	y of protective devices: type and rated current for fault protection (411.3)	F	Pass						
5.8	Presence	e and adequacy of circuit protective conductors (411.3.1: Section 543)	F	Pass						
5.9	Wiring sy	stem(s) appropriate for the type and nature of the installation and external influences	s (Section 522) F	Pass						
5.10	Conceale	ed cables installed in prescribed zones (see Section D. Extent and limitations) (522.6	.202)	NV						
5.11		oncealed under floors, above ceilings or in walls/partitions, adequately protected aga	ainst damage (see Section D.	NV						
		nd limitations) (522.6.204)								
		ADDITIONAL REQUIREMENTS FOR RCD NOT EXCEEDING 30 mA:		_						
5.12.1		ocket-outlets of rating 32 A or less, unless an exception is permitted (411.3.3)		Pass						
5.12.2	_	upply of mobile equipment not exceeding 32 A rating for use outdoors (411.3.3) es concealed in walls at a depth of less than 50 mm (522.6.202; 522.6.203)		N/A						
5.12.3	_		NV Pass							
5.12.4	_	For cables concealed in walls/partitions containing metal parts regardless of depth (522.6.203)								
5.12.5		uits supplying luminaires within domestic (household) premises (411.3.4)		Pass						
5.12.6		ng that is accessible to the public (714.411.3.4)		N/A						
5.13	_	n of fire barriers, sealing arrangements and protection against thermal effects (Section	,	Pass						
5.14		ables segregated/separated from Band I cables (528.1)		Pass						
5.15		egregated/separated from communications cabling (528.2)		Pass						
5.16		egregated/separated from non-electrical services (528.3)		Pass						
5.17 TER 5.17.1	1	DF CABLES AT ENCLOSURES - INDICATE EXTENT OF SAMPLING IN SECTION ions soundly made and under no undue strain (526.6)		o) Pass						
5.17.1	_	insulation of a conductor visible outside enclosure (526.8)		Pass						
5.17.2	_	ons of live conductor sadequately enclosed (526.5)		Pass						
5.17.4		tely connected at point of entry to enclosure (glands, bushes etc.) (522.8.5)		Pass						
5.18	·	n of accessories including socket-outlets, switches and joint boxes (651.2 (v))		Pass						
5.10	Suitability of accessories for external influences (512.2)									
5.20				Pass Pass						
0.20	Adequacy of working space/accessibility to equipment (132.12; 513.1)									
5 21	Sinale-po	ble switching or protective devices in line conductors only (132 14: 530 3 3)	F	Pass						
5.21 6.0 LOC/		ble switching or protective devices in line conductors only (132.14; 530.3.3)	F	Pass
