 - 3.1** To pay the Rent as set out above
 - 3.2** (a) To pay any council tax which the Tenant is obliged to pay under the Local Government Finance Act 1992 or any regulations under that Act

All original tenants must meet and accept the replacement tenant(s). All tenants must be present when signing the new tenancy agreement. Appropriate fees must be paid once a new tenancy agreement has been created and correct documentation collected.

4. IF the Tenant

4.1 is at least 14 days late in paying the Rent or any part of it, whether or not the Rent has been formally demanded, or

4.2 has broken any of the terms of this Agreement

then, subject to any statutory provisions, the Landlord may recover possession of the Property and the tenancy will come to an end. Any other rights or remedies the Landlord may have will remain in force. (**Note:** The Landlord cannot recover possession without an order of the court under the Housing Act 1988. Except in certain cases set out in the Act of substantial arrears of rent, the court has a discretion whether or not to make an order and is likely to take account of whether unpaid rent has later been paid or a breach of the terms of the tenancy has been made good.)

(**Note:** This clause does not affect the Tenant's rights under the Protection from Eviction Act 1977.)

5. THE Landlord agrees with the Tenant

5.1 That the Tenant has the right to possess and enjoy the Property during the tenancy without any interruption from the Landlord or any person claiming through or in trust for the Landlord. But:

(a) this clause does not limit any of the rights under this Agreement which the Tenant has agreed to allow the Landlord to exercise

(b) this clause does not prevent the Landlord from taking lawful steps to enforce his rights against the Tenant if the Tenant breaks any of the terms of this Agreement

5.2 To pay all charges in respect of the Property except those which by the terms of this Agreement the Tenant has expressly agreed to pay and to pay to the Tenant the amount of any such charge which another person has compelled the Tenant to pay.

5.3 To keep the Property and its contents (except the Tenant's personal property, unless otherwise agreed in writing with the Tenant) insured against damage or destruction by fire and other usual risks for the full cost of rebuilding an reinstating the Property unless the policy is rendered void by anything done or not done by the Tenant or a person under the Tenant's control

5.4 If the Property is damaged to such an extent that the Tenant cannot live in it, the Rent will cease to be payable until the Property is rebuilt or repaired so that the Tenant can live there again unless:

(a) the cause of the damage is something which the Tenant did or failed to do as a result of which the Landlord's insurance policy relating to the Property has become void; and

(b) the Landlord had given the Tenant notice of what the policy required

Any dispute about whether this clause applies must be submitted to arbitration under Part I of the Arbitration Act 1996 if both parties agree to that in writing after the dispute has arisen.

5.5 To keep in repair the structure and exterior of the Property including drains, gutters, and external pipes, and to keep in repair and proper working order the installations for the supply of water, gas and electricity, for sanitation (including basins, sinks, baths and sanitary conveniences) and for space heating and heating water. This clause does not oblige the Landlord to repair until the Tenant has given notice of the defect and the Tenant is obliged to take proper care of the Property and to do small jobs which a reasonable tenant would do.

5.6 To ensure that all appliances in the Property satisfy all applicable safety requirements

6. IF this Agreement is signed before the Landlord or the Landlord's agent has fully complied with all relevant prescribed requirements under the immigration Act 2014, the grant in clause 1 above is conditional upon the Landlord or the Landlord's agent being satisfied on reasonable grounds after completion of the prescribed requirements that the grant of rights given by the Agreement would not give rise to a contravention of the provisions Act

7. WHERE the context permits

7.1 "The Landlord" includes the successors to the original landlord

7.2 "The Tenant" includes the successors to the original tenant

7.3 "The Property" includes any part of the Property

Energy Efficiency Rating

The graph shows the current energy efficiency of your home.

The higher the rating the lower your fuel bills are likely to be.

The potential rating shows the effect of undertaking the recommendations on page 3.

The average energy efficiency rating for a dwelling in England and Wales is band D (rating 60).

The EPC rating shown here is based on standard assumptions about occupancy and energy use and may not reflect how energy is consumed by individual occupants.

Top actions you can take to save money and make your home more efficient

Recommended measures	Indicative cost	Typical savings over 3 years
1 Low energy lighting for all fixed outlets	£20	£ 54
2 Solar water heating	£4,000 - £6,000	£ 159
3 Solar photovoltaic panels, 2.5 kWp	£5,000 - £8,000	£ 861

Lighting	Low energy lighting in 73% of fixed outlets	★★★★★

Current primary energy use per square metre of floor area: 149 kWh/m² per year

The assessment does not take into consideration the physical condition of any element. 'Assumed' means that the insulation could not be inspected and an assumption has been made in the methodology based on age and type of construction.

Low and zero carbon energy sources

Low and zero carbon energy sources are sources of energy that release either very little or no carbon dioxide into the atmosphere when they are used. Installing these sources may help reduce energy bills as well as cutting carbon. There are none provided for this home.

Your home's heat demand

For most homes, the vast majority of energy costs derive from heating the home. Where applicable, this table shows the energy that could be saved in this property by insulating the loft and walls, based on typical energy use (shown within brackets as it is a reduction in energy use).

Heat demand	Existing dwelling	Impact of loft insulation	Impact of cavity wall insulation	Impact of solid wall insulation
Space heating (kWh per year)	8,854	N/A	N/A	N/A
Water heating (kWh per year)	3,141			

You could receive Renewable Heat Incentive (RHI) payments and help reduce carbon emissions by replacing your existing heating system with one that generates renewable heat, subject to meeting minimum energy efficiency requirements. The estimated energy required for space and water heating will form the basis of the payments. For more information, search for the domestic RHI on the www.gov.uk website.

Recommendations

The measures below will improve the energy performance of your dwelling. The performance ratings after improvements listed below are cumulative; that is, they assume the improvements have been installed in the order that they appear in the table. Further information about the recommended measures and other simple actions you could take today to save money is available at www.gov.uk/energy-grants-calculator. Before installing measures, you should make sure you have secured the appropriate permissions, where necessary. Such permissions might include permission from your landlord (if you are a tenant) or approval under Building Regulations for certain types of work.

Recommended measures	Indicative cost	Typical savings per year	Rating after improvement
Low energy lighting for all fixed outlets	£20	£ 18	C77
Solar water heating	£4,000 - £6,000	£ 53	C78
Solar photovoltaic panels, 2.5 kWp	£5,000 - £8,000	£ 287	B86

Opportunity to benefit from a Green Deal on this property

Green Deal Finance allows you to pay for some of the cost of your improvements in instalments under a Green Deal Plan (note that this is a credit agreement, but with instalments being added to the electricity bill for the property). The availability of a Green Deal Plan will depend upon your financial circumstances. There is a limit to how much Green Deal Finance can be used, which is determined by how much energy the improvements are estimated to save for a 'typical household'.

You may be able to obtain support towards repairs or replacements of heating systems and/or basic insulation measures, if you are in receipt of qualifying benefits or tax credits. To learn more about this scheme and the rules about eligibility, call the Energy Saving Advice Service on **0300 123 1234** for England and Wales.

About the impact of buildings on the environment

One of the biggest contributors to global warming is carbon dioxide. The energy we use for heating, lighting and power in homes produces over a quarter of the UK's carbon dioxide emissions.

The average household causes about 6 tonnes of carbon dioxide every year. Based on this assessment, your home currently produces approximately 3.3 tonnes of carbon dioxide every year. Adopting the recommendations in this report can reduce emissions and protect the environment. If you were to install these recommendations you could reduce this amount by 1.2 tonnes per year. You could reduce emissions even more by switching to renewable energy sources.

The environmental impact rating is a measure of a home's impact on the environment in terms of carbon dioxide (CO₂) emissions based on standardised assumptions about occupancy and energy use. The higher the rating the less impact it has on the environment.
