

# TENANCY AGREEMENT

for letting a furnished dwelling-house on an Assured Shorthold Tenancy under Part 1 of the Housing Act 1988

This is a form of legal document and is not produced or drafted for use without technical assistance, by persons unfamiliar with the law of landlord and tenant. **All tenants shall be held jointly and severally liable for all terms and obligations under this Lease.**

IF EITHER PARTY DOES NOT UNDERSTAND THIS AGREEMENT OR ANYTHING IN IT, HE OR SHE IS STRONGLY ADVISED TO ASK AN INDEPENDENT PERSON FOR AN EXPLANATION. SUCH AN EXPLANATION MIGHT BE GIVEN BY A SOLICITOR, A CITIZENS' ADVICE BUREAU OR A HOUSING ADVICE CENTRE.

Note that any assured tenancy (including a statutory periodic tenancy) commencing on or after 28th February 1997 will be an assured shorthold tenancy unless it falls within any paragraph in Schedule 2A of the Housing Act 1988.

This form should not be used for granting a tenancy to a person who is already a protected or statutory tenant or a protected occupier: see Housing Act 1988.

## DEPOSITS

If the landlord takes a deposit, the landlord must, within 30 days from the date of payment, give the tenant and any person who has paid the deposit on the tenant's behalf, certain written information about the way the deposit is protected. See the Housing Act 2004 s 213(5) and the Housing (Tenancy Deposits) (Prescribed Information) Order 2007, S.I. 2007/797. The landlord may not require a deposit which consists of property other than money.

- 1. SUBJECT** to clause 6 of this Agreement where it applies, the Landlord lets the Property to the Tenant for the Term at the Rent payable as set out above.
- 2. THIS** Agreement creates an assured shorthold tenancy within Part I Chapter II of the Housing Act 1988. This means that when the Term expires the Landlord can recover possession as set out in section 21 of that Act unless the Landlord gives the Tenant a notice under paragraph 2 of Schedule 2A to that Act stating that the tenancy is no longer an assured shorthold tenancy.
- 3. THE** Tenant agrees with the Landlord -
  - 3.1** To pay the Rent as set out above
  - 3.2** (a) To pay any council tax which the Tenant is obliged to pay under the Local Government Finance Act 1992 or any regulations under that Act  
(b) To pay to the Landlord the amount of any council tax while the tenancy continues if the Landlord becomes obliged to pay under that Act or those Regulations for any part of the period of the tenancy even when Tenant ceases to live at the property.
  - 3.3** Except where included, to pay any council tax and all charges for the supply of telephone, gas, electricity, water and sewage, TV licence and broadband services to the Property during the tenancy. Where necessary, the sums demanded by the service provider will be apportioned according to the duration of the tenancy. The sums covered by this clause include standing charges or other similar charges and VAT as well as charges for actual consumption
  - 3.4** To keep the interior of the Property, the internal decorations and the Fixtures, Furniture and Effects in good repair and condition (except for damage caused by accidental fire and except for anything which the Landlord is liable to repair under this Agreement or by law) and to replace if necessary any items of the Fixtures, Furniture and Effects which have been damaged or destroyed. This clause does not oblige the Tenant to put the Property into better repair than it was in at the beginning of the tenancy
  - 3.5** To allow the Landlord or anyone with the Landlord's authority to enter the Property at reasonable times of the day to inspect its condition and state of repair, if the Landlord has given 24 hours' notice beforehand
  - 3.6** To use the Property as a private dwelling-house only. This means the Tenant must not carry on any profession, trade or business at the Property and must not allow anyone else to do so
  - 3.7** Not to alter or add to the Property or do or allow anyone else to do anything on the Property which the Tenant might reasonably foresee would increase the risk of fire
  - 3.8** Not to do or allow anyone else to do anything on the Property which may be a nuisance to, or cause damage or annoyance to, the tenants or occupiers of any adjoining premises or which may adversely affect the energy efficiency rating or the environmental impact rating of the Property for the purposes of an energy performance certificate
  - 3.9** (a) During the first three months of the tenancy you are not permitted to assign or sublet the property and you must not part with possession of it in any other way.  
(b) Thereafter not to assign, sublet or part with possession of the Property in any way without the consent of the Landlord, that consent not to be unreasonably withheld. If a tenant wishes to drop out of a tenancy agreement they must find a potential replacement themselves and correct documentation will need to be provided prior to consideration of the landlord. All original tenants must meet and accept the replacement tenant(s). All tenants must be present when signing the new tenancy agreement. Appropriate fees must be paid once a new tenancy agreement has been created and correct documentation collected.
  - 3.10** To give the Landlord a copy of any notice given under the Party Wall etc. Act 1996 within 7 days of receiving it and not to do anything as a result of the notice unless required to do so by the Landlord
  - 3.11** Not to keep or allow anyone else to keep a pet of any kind in the Property without the written consent of the Landlord
  - 3.12** At the end of the Term or earlier if the tenancy comes to an end more quickly to deliver the Property up to the Landlord in the condition it should be in if the Tenant has performed the Tenant's obligations under this Agreement
  - 3.13** Not to remove any of the Fixtures, Furniture and Effects from the Property and to leave the Furniture and Effects at the end of the tenancy where they were at the beginning

  - 3.17** Not to permit any person aged 18 or over to continue to occupy the Property (whether or not named in this Agreement) if that person becomes disqualified as a result of his or her immigration status for the purposes of the Immigration Act 2014.
  - 3.18** Strictly not permitted the production, possession, supply and use of controlled drugs within the premises of the property.
  - 3.19** Not to leave the Property unoccupied for more than 28 consecutive days without giving notice in writing to the Landlord or Managing Agent and to ensure that the Property is secure whenever the Property is unoccupied. then, subject to any statutory provisions, the Landlord may recover possession of the Property and the tenancy will come to an end. Any other rights or remedies the Landlord may have will remain in force. (**Note:** The Landlord cannot recover possession without an order of the court under the Housing Act 1988. Except in certain cases set out in the Act of substantial arrears of rent, the court has a discretion whether or not to make an order and is likely to take account of whether unpaid rent has later been paid or a breach of the terms of the tenancy has been made good.)

(**Note:** This clause does not affect the Tenant's rights under the Protection from Eviction Act 1977.)

**5. THE Landlord agrees with the Tenant**

- 5.1** That the Tenant has the right to possess and enjoy the Property during the tenancy without any interruption from the Landlord or any person claiming through or in trust for the Landlord. But:

- 5.4** If the Property is damaged to such an extent that the Tenant cannot live in it, the Rent will cease to be payable until the Property is rebuilt or repaired so that the Tenant can live there again unless:
- (a) the cause of the damage is something which the Tenant did or failed to do as a result of which the Landlord's insurance policy relating to the Property has become void; and
  - (b) the Landlord had given the Tenant notice of what the policy required

- 5.6** To ensure that all appliances in the Property satisfy all applicable safety requirements

- 6. IF** this Agreement is signed before the Landlord or the Landlord's agent has fully complied with all relevant prescribed requirements under the immigration Act 2014, the grant in clause 1 above is conditional upon the Landlord or the Landlord's agent being satisfied on reasonable grounds after completion of the prescribed requirements that the grant of rights given by the Agreement would not give rise to a contravention of the provisions Act

## Energy Performance Certificate

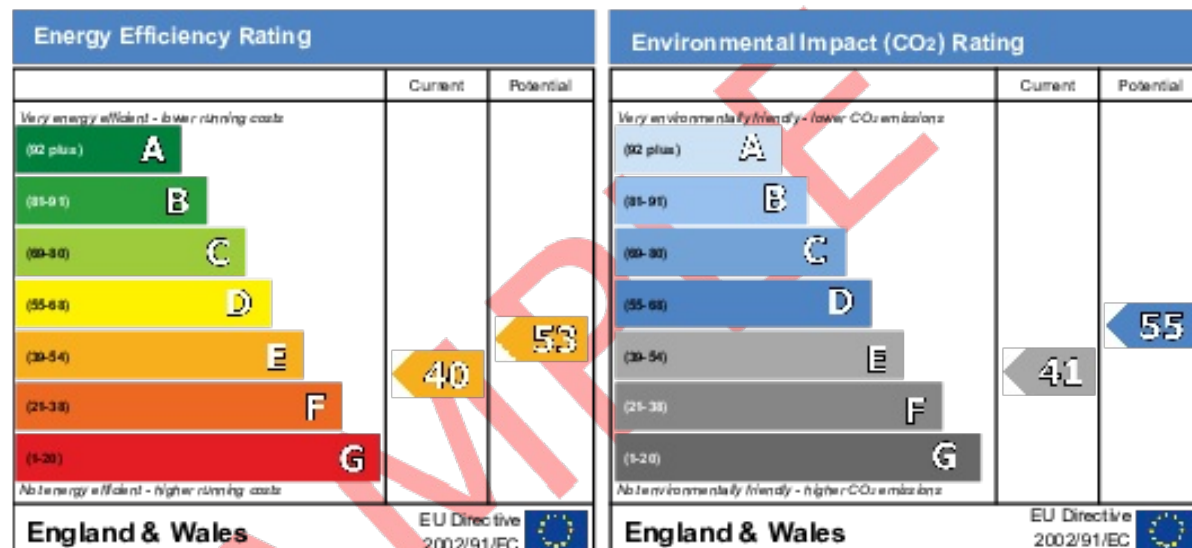

# Energy Performance Certificate

51, Millfield Lane,  
YORK, YO10 3AW

Dwelling type: Semi-detached house  
Date of assessment: 01 December 2008  
Date of certificate: 01 December 2008  
Reference number: 8018-6 122-5829-3579-0006  
Total floor area: 98 m<sup>2</sup>

This home's performance is rated in terms of the energy use per square metre of floor area, energy efficiency based on fuel costs and environmental impact based on carbon dioxide (CO<sub>2</sub>) emissions.

The energy efficiency rating is a measure of the overall efficiency of a home. The higher the rating the more energy efficient the home is and the lower the fuel bills are likely to be.

The environmental impact rating is a measure of this home's impact on the environment in terms of Carbon dioxide (CO<sub>2</sub>) emissions. The higher the rating the less impact it has on the environment.

## Estimated energy use, carbon dioxide (CO<sub>2</sub>) emissions and fuel costs of this home

	Current	Potential
Energy use	423 kWh/m <sup>2</sup> per year	299 kWh/m <sup>2</sup> per year
Carbon dioxide emissions	6.8 tonnes per year	4.8 tonnes per year
Lighting	£53 per year	£53 per year
Heating	£792 per year	£528 per year
Hot water	£289 per year	£289 per year

Based on standardised assumptions about occupancy, heating patterns and geographical location, the above table provides an indication of how much it will cost to provide lighting, heating and hot water to this home. The fuel costs only take into account the cost of fuel and not any associated service, maintenance or safety inspection. This certificate has been provided for comparative purposes only and enables one home to be compared with another. Always check the date the certificate was issued, because fuel prices can increase over time and energy saving recommendations will evolve.

To see how this home can achieve its potential rating please see the recommended measures.

The address and energy rating of the dwelling in this EPC may be given to EST to provide information on financial help for improving its energy performance.

### About this document

The Energy Performance Certificate for this dwelling was produced following an energy assessment undertaken by a qualified assessor, accredited by Elmhurst Energy Systems, to a scheme authorised by the Government. This certificate was produced using the RdSAP 2005 assessment methodology and has been produced under the Energy Performance of Buildings (Certificates and Inspections) (England and Wales) Regulations 2007 as amended. A copy of the certificate has been lodged on a national register.

### If you have a complaint or wish to confirm that the certificate is genuine

Details of the assessor and the relevant accreditation scheme are as above. You can get contact details of the accreditation scheme from their website at [www.elmhurstenergy.co.uk](http://www.elmhurstenergy.co.uk) together with details of their procedures for confirming authenticity of a certificate and for making a complaint.

### About the building's performance ratings

The ratings on the certificate provide a measure of the building's overall energy efficiency and its environmental impact, calculated in accordance with a national methodology that takes into account factors such as insulation, heating and hot water systems, ventilation and fuels used. The average Energy Efficiency Rating for a dwelling in England and Wales is band E (rating 46).

Not all buildings are used in the same way, so energy ratings use 'standard occupancy' assumptions which may be different from the specific way you use your home. Different methods of calculation are used for homes and for other buildings. Details can be found at [www.communities.gov.uk/epbd](http://www.communities.gov.uk/epbd).

Buildings that are more energy efficient use less energy, save money and help protect the environment. A building with a rating of 100 would cost almost nothing to heat and light and would cause almost no carbon emissions. The potential ratings on the certificate describe how close this building could get to 100 if all the cost effective recommended improvements were implemented.

### About the impact of buildings on the environment

One of the biggest contributors to global warming is carbon dioxide. The way we use energy in buildings causes emissions of carbon. The energy we use for heating, lighting and power in homes produces over a quarter of the UK's carbon dioxide emissions and other buildings produce a further one-sixth.

The average household causes about 6 tonnes of carbon dioxide every year. Adopting the recommendations in this report can reduce emissions and protect the environment. You could reduce emissions even more by switching to renewable energy sources. In addition there are many simple everyday measures that will save money, improve comfort and reduce the impact on the environment. Some examples are given at the end of this report.

### Summary of this home's energy performance related features

The following is an assessment of the key individual elements that have an impact on this home's performance rating. Each element is assessed against the following scale: Very poor / Poor / Average / Good / Very good.

Elements	Description	Current performance	
		Energy Efficiency	Environmental
Walls	Solid brick, as built, no insulation (assumed) Cavity wall, with internal insulation	Very poor Good	Very poor Good
Roof	Pitched, 12 mm loft insulation Flat, insulated (assumed)	Very poor Average	Very poor Average
Floor	Suspended, no insulation (assumed)	-	-
Windows	Fully double glazed	Average	Average
Main heating	Boiler and radiators, mains gas	Average	Good
Main heating controls	Programmer, room thermostat and TRVs	Average	Average
Secondary heating	None	-	-
Hot water	Electric immersion, standard tariff	Very poor	Poor
Lighting	Low energy lighting in 80% of fixed outlets	Very good	Very good
Current energy efficiency rating		E 40	
Current environmental impact (CO <sub>2</sub> ) rating		E 41	

### Low and zero carbon energy sources

None

## Recommendations

The measures below are cost effective. The performance ratings after improvement listed below are cumulative, that is they assume the improvements have been installed in the order that they appear in the table.

Lower cost measures (up to £500)	Typical savings per year	Performance ratings after improvement	
		Energy efficiency	Environmental impact
1 Increase loft insulation to 270 mm	£106	E 45	E 46
<b>Sub-total</b>	<b>£106</b>		
<b>Higher cost measures (over £500)</b>			
2 Replace boiler with Band A condensing boiler	£158	E 53	D 55
<b>Total</b>	<b>£264</b>		
Potential energy efficiency rating		E 53	
Potential environmental impact (CO <sub>2</sub> ) rating		D 55	

## Further measures to achieve even higher standards

The further measures listed below should be considered in addition to those already specified if aiming for the highest possible standards for this home. However you should check the conditions in any covenants, planning conditions, warranties or sale contracts.

3 Solar water heating	£93	D 59	D 59
4 50 mm internal or external wall insulation	£142	D 67	C 69
5 Solar photovoltaic panels, 2.5 kWp	£150	C 76	C 78
Enhanced energy efficiency rating		C 76	
Enhanced environmental impact (CO <sub>2</sub> ) rating		C 78	

Improvements to the energy efficiency and environmental impact ratings will usually be in step with each other. However, they can sometimes diverge because reduced energy costs are not always accompanied by a reduction in carbon dioxide (CO<sub>2</sub>) emissions.

### About the cost effective measures to improve this home's energy ratings

If you are a tenant, before undertaking any work you should check the terms of your lease and obtain approval from your landlord if the lease either requires it, or makes no express provision for such work.

#### Lower cost measures (typically up to £500 each)

These measures are relatively inexpensive to install and are worth tackling first. Some of them may be installed as DIY projects. DIY is not always straightforward, and sometimes there are health and safety risks, so take advice before carrying out DIY improvements.

##### 1 Loft insulation

Loft insulation laid in the loft space or between roof rafters to a depth of at least 270 mm will significantly reduce heat loss through the roof; this will improve levels of comfort, reduce energy use and lower fuel bills. Insulation should not be placed below any cold water storage tank, any such tank should also be insulated on its sides and top, and there should be boarding on battens over the insulation to provide safe access between the loft hatch and the cold water tank. The insulation can be installed by professional contractors but also by a capable DIY enthusiast. Loose granules may be used instead of insulation quilt; this form of loft insulation can be blown into place and can be useful where access is difficult. The loft space must have adequate ventilation to prevent dampness; seek advice about this if unsure. Further information about loft insulation and details of local contractors can be obtained from the National Insulation Association ([www.nationalinsulationassociation.org.uk](http://www.nationalinsulationassociation.org.uk)).

#### Higher cost measures (typically over £500 each)

##### 2 Band A condensing boiler

A condensing boiler is capable of much higher efficiencies than other types of boiler, meaning it will burn less fuel to heat this property. This improvement is most appropriate when the existing central heating boiler needs repair or replacement, but there may be exceptional circumstances making this impractical. Condensing boilers need a drain for the condensate which limits their location; remember this when considering remodelling the room containing the existing boiler even if the latter is to be retained for the time being (for example a kitchen makeover). Building Regulations apply to this work, so your local authority building control department should be informed, unless the installer is registered with a competent persons scheme, and can therefore self-certify the work for Building Regulation compliance. Ask a qualified heating engineer to explain the options.

### About the further measures to achieve even higher standards

Further measures that could deliver even higher standards for this home. You should check the conditions in any covenants, planning conditions, warranties or sale contracts before undertaking any of these measures. If you are a tenant, before undertaking any work you should check the terms of your lease and obtain approval from your landlord if the lease either requires it, or makes no express provision for such work.

##### 3 Solar water heating

A solar water heating panel, usually fixed to the roof, uses the sun to pre-heat the hot water supply. This will significantly reduce the demand on the heating system to provide hot water and hence save fuel and money. The Solar Trade Association has up-to-date information on local installers and any grant that may be available.

##### 4 Internal or external wall insulation

Solid wall insulation involves adding a layer of insulation to either the inside or the outside surface of the external walls, which reduces heat loss and lowers fuel bills. As it is more expensive than cavity wall insulation it is only recommended for walls without a cavity, or where for technical reasons a cavity cannot be filled. Internal insulation, known as dry-lining, is where a layer of insulation is fixed to the inside surface of external walls; this type of insulation is best applied when rooms require redecorating and can be installed by a competent DIY enthusiast. External solid wall insulation is the application of an insulant and a weather-protective finish to the outside of the wall. This may improve the look of the home, particularly where existing brickwork or rendering is poor, and will provide long-lasting weather protection. Further information can be obtained from the National Insulation Association ([www.nationalinsulationassociation.org.uk](http://www.nationalinsulationassociation.org.uk)). It should be noted that planning permission might be required.

##### 5 Solar photovoltaic (PV) panels

A solar PV system is one which converts light directly into electricity via panels placed on the roof with no waste and no emissions. This electricity is used throughout the home in the same way as the electricity purchased from an energy supplier. The British Photovoltaic Association has up-to-date information on local installers who are qualified electricians and on any grant that may be available. Planning restrictions may apply in certain neighbourhoods and you should check this with the local authority. Building Regulations apply to this work, so your local authority building control department should be informed, unless the installer is appropriately qualified and registered as such with a competent persons scheme, and can therefore self-certify the work for Building Regulation compliance.

### What can I do today?

Actions that will save money and reduce the impact of your home on the environment include:

- Ensure that you understand the dwelling and how its energy systems are intended to work so as to obtain the maximum benefit in terms of reducing energy use and CO<sub>2</sub> emissions.
- Check that your heating system thermostat is not set too high (in a home, 21°C in the living room is suggested) and use the timer to ensure you only heat the building when necessary.
- Make sure your hot water is not too hot - a cylinder thermostat need not normally be higher than 60°C.
- Turn off lights when not needed and do not leave appliances on standby. Remember not to leave chargers (e.g. for mobile phones) turned on when you are not using them.
- Close your curtains at night to reduce heat escaping through the windows.
- If you're not filling up the washing machine, tumble dryer or dishwasher, use the half-load or economy programme.
